

Dear Sirs and Madaams;

It has come to my attention that legislation or regulations may be coming that will effect the use of fm translators for stations like Klove. This bothers me immensely as I enjoy the benefits of stations like KLOVE and the peace they bring to our community. Their possitive influence and soothing music throughout the day help keep me centered as a person, and calmer as a driver!! Just when I want to let my frustrations boil during a commute, KLOVE will have a moment sharing life lessons and redirecting us, the listeners to more important aspects of life in the US and this world. I often times stop thinking about me and start thinking about others who are less fortunate or aren't as blessed as I am....even though I am stuck in horrible traffic.

If I did not have them, the regular pop or rock station that promotes less than constructive behavior (ie..running through downtown naked, recently in CS, CO) would more populate the area and less possitive stations would become either 1)gone or 2)more expensive to run and have less coverage.

Please keep the fm translator network available for stations like KLOVE and others.
